# Assumptions

You are familiar with setting up a Drupal site

You are familiar with the Views module

You are familiar with:

- Creating Content Type

- Creating Content

# Topics

A common Drupal site building recipe is how to set up an image gallery.

This session will cover the challenges encountered while trying to setup an image gallery and how to overcome them.

At the end of the session, attendees will understand how to have a basic responsive image gallery up and running in different devices such as desktop, tablet, and mobile.

# Drupal 8 System Requirements

- **MySQL 5.5.3/MariaDB/Percona/equivalent or higher with PDO and an InnoDB-compatible primary storage engine, PostgreSQL 8.3 or higher with PDO, SQLite 3.3.7 or higher**
- **PHP 5.5 or higher**

# Two Examples

- **Basic Image Gallery**
- **HTML5 Responsive Image Gallery with Juicebox**
