- Numerous Customer & Industry Awards

Producing Structured Content at HHS.gov

Our Origin Story

Challenges

The Opportunity

Getting the Green Light

Producing Structured Content at HHS.gov

Content Models and Markup

Drupal's Contribution

Stakeholder Engagement

Early Lessons Learned

Origin Story

- **Interviews with industry experts**
- **Proactive preparation for the future**
 - Device agnostic, future-proof content
- **The hunt for the C.O.P.E. Unicorn**
 - Often a goal, it's seldom realized
- **Decoupling content and presentation**
- **Realization that Siri, Cortana, Wearables
Google Now, OneBox, and Knowledge
Graph are here**

Challenges

Structured Content is hidden.

It's easy to over-engineer.

Change is hard.

Challenges

PTSD reactions to words like

taxonomy

governance

metadata

Decentralized content authorship

Exploiting the Opportunity

**New Responsive Design + Migration to Drupal =
Our Golden Opportunity**

Getting a Green Light

- **Promised a phased migration**
- **Cross-functional working group**
- **Instant gratification**
 - **Search and social media**
- **Rapid response to change**

Origin Story (review)

From the Desk of the Secretary: The Affordable Care Act is Working

September 27, 2014 | By: *Sylvia Mathews Burwell, HHS Secretary*

On Tuesday, I had the opportunity to talk about the Affordable Care Act at the Brookings Institution.

When it comes to the Affordable Care Act, it's our belief that the three most important measures are affordability, access, and quality – and that when you consider the law through this lens, the evidence points to a clear conclusion: The Affordable Care Act is working – and families, businesses, and taxpayers are better off as a result.

Four years after President Obama signed the law, middle-class families have more security, and many of those who already had insurance now have better coverage. Fewer Americans are uninsured. At the same time, we're spending our health care dollars more wisely, and we're starting to receive higher quality care.

As a country, we've been wrestling with the question of how to cover the uninsured for more than a century. By the time the Affordable Care Act was passed, tens of millions of Americans were

Content Type: Article - Titles and Descriptions

Title*

Unique Browser Title **<65 characters**, <title> tag

Full Title*

Unique Full Title, likely to be the <H1> or Headline.

Article Description*

Social and Search Snippet Friendly **<160 characters**

Detailed Description*

Keyword rich description, may expand on Short Description with no character limit.

TwitterCard (Summary with Large Image)	Opengraph (Facebook / Pinterest)	Schema.org (article [itemprop =])	Metatag	Field Name	Help Text for Editor	Required (Y/N)	Allowed	Field Type	Notes
<Title Section Container>									
defaults to OpenGraph	og-title	name	ShortTitle	Title	Used for browser title, breadcrumbs, search results and social sharing. Maximum 65 characters, keyword rich.	Y	1	Text	in markup - not a CMS field the conventional meta <title> tag Currently adds JHHS.gov
		headline	FullTitle	Full Title	Unrestricted full title. Headline on page.	Y	1	Text	
<Description Section Container>									
defaults to OpenGraph	og-description	description	ShortDescription	Short Description	Used for social, search engine results. Use keywords that start a full sentence (not a string of topics). Succinct and action oriented. Less than <160 characters full, keyword rich description - expand on the short description where possible to keep the keywords / call to action at the start of the description. May be used as a Summary field.	Y	1	WYSIWYG	in markup - not a CMS field Rich text to allow for live links and formatting.
			DetailedDescription	Full Description		Y	1	WYSIWYG	conventional meta <description> tag
		articlebody	ArticleBody	Body		Y	1	WYSIWYG	conventional <body> tag
<Related Multimedia Container>									
defaults to OpenGraph	og-image	primaryImageofPage	Image	Image	Image should be minimum 300 x 150 kb and ideally at a 16:9 or 2:1 ratio (landscape) or 238 x 357 (for portraits)	N	M	upload/url	in markup - not a CMS field Identify 'Medium' and 'Large' sizes
	og-image	thumbnailUrl	Thumbnail	Social Image (Thumbnail)	Used for social, search engine results. Image should be minimum 100x100 and a 1:1 ratio.	N	1	upload/url	This is added to Meta Tag module
	about		Topics	Topics	Categories or keywords	Y	M	Text	
defaults to OpenGraph	twitter:site = @hhsgov	creator	SourceOrganization	Operating Division	OpDiv level (CDC, FDA, etc)	Y	1	Dropdown	Controlled Vocabulary - Defaults to HHS Office of the Secretary
			CreatedBy	Created by	Office Level (content owner responsible for review and maintenance)	Y	1	Dropdown	Controlled Vocabulary - Displays On Page
			DateCreated	Date Created					
		dateCreated			CMS creation date - first Draft	Y	1	Date	If published after creation date, editor can manually change (or backdate). We are migrating 'posted' date as that is required and unlikely to be blank in Displays on page. Used for annual review reports.
		dateModified	DateLastModified	Date Last Modified	To be modified by editor reviewing or updating the article.	Y	1	Date	
	og:url (canonical url)	url	Url	Url	Automatically generated by CMS	Y	1	Default	
	publisher (url of hhs FB page)	Publisher (Google+url)	Publisher	Publisher	U.S. Department of Health and Human Services	Y	1	Default	default global markup - not shown to content editor

And-Structured-Content-Models](https://github.com/GSA/Open-And-Structured-Content-Models)**

Assembly Required

- A 'page' consists of multiple nodes and content types. It is made up of individual elements which can be reused in many ways.
- Content types have rules to their use in order to maintain consistency in design, site structure, and user experience.

Drupal Metatag Module

The screenshot shows the Drupal Metatag module configuration interface. On the left is a sidebar with various settings categories. The 'Meta tags' category is highlighted with a red arrow and the text 'installing the module'. Below it, the 'Meta tags' section is expanded, showing 'Content type: article'. A red arrow points from the text 'gives you everything you need' to the 'Meta tags' section. The main content area on the right is titled 'Browse available tokens.' and contains instructions on how to configure meta tags. It includes input fields for 'Page title', 'Description', 'Abstract', and 'Keywords', each with a description of its purpose. At the bottom, there are four expandable sections: 'OPEN GRAPH', 'FACEBOOK', 'TWITTER CARD', and 'ADVANCED'. The 'TWITTER CARD' section is highlighted with a red arrow.

Publishing options
Published, Promoted to front page

Browse available tokens.
Configure the meta tags below. Tokens, e.g. "[node:summary]", automatically insert the corresponding information from that field or value, which helps to avoid redundant meta data and possible search engine penalization; see the "Browse available tokens" popup for more details.

Page title
[node:title] | [site:name]
The text to display in the title bar of a visitor's web browser when they view this page. This meta tag may also be used as the title of the page when a visitor bookmarks or favorites this page.

Description
[node:summary]
Brief and concise summary of the page's content, preferably 150 characters or less. The description meta tag may be used by search engines to display a snippet about the page in search results.

Abstract
A brief and concise summary of the page's content, preferably 150 characters or less. The abstract meta tag may be used by search engines for archiving purposes.

Keywords
A comma-separated list of keywords about the page. This meta tag is *not* supported by most search engines.
